EDUCATION

Columbia University

B.A. Computer Science

New York, NY

August 2022 – May 2026

- **GPA:** 3.88/4
- **Courses:** Advanced Programming in C, UI Design, Data Structures in Java, Introduction to Databases & Algorithms, Artificial Intelligence, Creative Embedded Systems, Mobile App Development iOS

EXPERIENCE

Co-Founder & Chief Product Officer

October 2024 - Present

Sapphire

New York, NY

- Co-founded and led product development for a dating app, defining the product vision and long term roadmap focused on intentional, people centered connections
- Designed and prototyped the mobile experience using Figma and React Native Expo, creating reusable UI components and scalable design templates
- Iterated on core product features including a custom matching algorithm while managing product development from user research to user experience refinement

Software Engineering Intern

June 2025 - December 2025

Shopfunder

New York, NY

- Increased customer acquisition by 80% by designing and deploying a responsive website and integrating Jotform workflows, reducing friction in lead capture and onboarding
- Automated customer management and sales tracking by migrating operations to Salesforce CRM, improving visibility into customer pipelines and enabling data-driven decision-making
- Created a custom data management tool using JavaScript and backend integrations to track and organize information for 5,000+ customers, significantly reducing manual processing time

Data Engineering Intern

June 2024 - December 2024

Pathway Catalyst

New York, NY

- Streamlined a previously manual loan intake process by building a web application that dynamically validates client form responses against servicing requirements
- Engineered backend logic to cross-check user-submitted data, reducing processing errors and significantly improving review efficiency
- Designed and maintained a MongoDB database to manage client records, enabling scalable updates, edits, and data integrity across applications

Course Preceptor

September 2023 - May 2024

Barnard College

New York, NY

- Managed audiovisual systems for a 90 person course lecture, ensuring seamless in-class technical delivery
- Maintained course web pages with a focus on clarity, accessibility, and intuitive navigation

STEM Instructor

June 2023 - August 2023

Baroody Camps, inc.

Alexandria, VA

- Led hands-on STEM activities for students ages 5–12, translating complex concepts into engaging, age-appropriate lessons that fostered curiosity and problem-solving
- Coordinated with a team of instructors to deliver cohesive programming and communicated weekly progress updates to parents, strengthening engagement and learning outcomes

TECHNICAL SKILLS

Languages: Python, Java, C, C++, HTML, CSS, TypeScript, SQL, Swift

Developer Tools: Git, Github, React, React Native, Expo, Figma, Flask, VS Code, Visual Studio, MySQL

Google Workspace, Microsoft Office, Adobe Creative Suite (Premiere, Photoshop, Lightroom, Illustrator), AV Equipment Usage, and Film Production
